# Photo Cropping Template

Using a craft knife cut along the black line. This shape is the same size as your Hexagonal Tile. Also, cut out the grey hexagon labeled with a 3. You are now ready to cut your photo down to size. Using the templates you just prepared, you can either create a photo that covers the entire Tile or a photo surrounded by a 1 cm border.

1 2 3

Crop without a Border

Place the template marked with a 1 on top of your photo. Move it around until you find your desired cropping. Pay attention to how you wish to hang the tile and whether a corner or a flat side will be facing up. Holding the template and photo in place, now place template 2 inside of template 1. Hold template 2 and the photo in place and remove template 1. Using a pencil trace a line around your photo. Remove the template and trim your photo to size. Attach your photo to the tile using glue or double-sided tape.

Crop with 1cm Border

Place the template marked with a 2 on top of your photo. Move it around until you find your desired cropping. Pay attention to how you wish to hang the tile and whether a corner or a flat side will be facing up. Holding the template and photo in place, now place template 3 inside of template 2. Hold template 3 and the photo in place and remove template 2. Using a pencil trace a line around your photo. Remove the template and trim your photo to size. Use template 2 to center your photo on the tile and attach your photo to the tile using glue or double-sided tape.
